

Welcome to Shade of Gray

Shade of Gray is a 13+ level *Myth II: Soulblighter* solo plug-in. This download contains the levels we have completed to date.

It should be noted that the sound files are place holders. We plan to do a better job once all the levels are done.

To use it: remove the folder called “local” from the folder in which the Myth II application is held. Place the Shade of Gray folder you have downloaded and uncompressed in the Myth II folder. Be sure it is called “local” otherwise it will not work. Be sure any third party plugins (that is those which are not Bungie patches) are removed from the “plugin” folder.

You may need to hold down the Shift key when selecting a new game for the first time. Start with “**Prologue: A Shade of Gray**” and continue playing from there.

Updates and progress reports can be found at <http://www.nono.com/phelot>

We hope you enjoy this plug-in and try additional material as it becomes available. We welcome feedback at max@nono.com.

We are grateful for material we have borrowed from:

Bungie

GodzFire's Forest Giant 2

Nekricide's Myth II Myrmidon

Ferian's Avatara v1.0 (to be found in future levels)

oogaBooga's Drone Unit (to be found in future levels)

We are also grateful for the numerous tools and tutorials found on the Mill.
